EXHIBITOR LIST

AI⁺ More than FinTech

智慧金融，永續未來

The development of financial technology (FinTech) and high-tech applications across the globe in recent years have given rise to innovative cross-sector integration of finance and technology and increased the efficiency of financial services. To promote the development of FinTech in Taiwan, incubate FinTech businesses with potential, and cultivate FinTech talents to improve the competitiveness of the finance industry in Taiwan, the Taiwan Financial Services Roundtable has, under the guidance of the Financial Supervisory Commission, established the "Financial Technology Development Fund" with donations from 13 entities including the Bankers Association, Taiwan Securities Association, Chinese National Futures Association, Securities Investment Trust & Consulting Association, Life Insurance Association, Non-Life Insurance Association, Taiwan Stock Exchange, Taipei Exchange, Taiwan Futures Exchange, Taiwan Depository & Clearing Corporation, Financial Information Service Co., Ltd., Joint Credit Information Center, and National Credit Card Center. It is the first public welfare fund established with the resources and powers of the finance industry for the development of FinTech in Taiwan. We hope that the integration of cross-industry resources can achieve economies of scale, accelerate innovation in the finance industry, and demonstrate the capacity for financial innovation in Taiwan. With the guidance of the FSC, "FinTech Taipei" has become a key annual event supported by the Financial Technology Development Fund. The Executive Yuan has included it as a key strategy for the Financial Development Action Plan. The event is organized by the Taiwan Financial Services Roundtable and Taiwan Academy for Banking and Finance. It integrates the resources of domestic and foreign FinTech companies, governments, academic institutions, and research institutions and makes use of regulatory technology (RegTech), artificial intelligence (AI), blockchain, virtual reality, and big data technologies. It provides domestic and foreign financial institutions, IT companies, and the public with opportunities for cooperation and learning through sensory, experience, and sharing. We hope that FinTech Taipei can be used to create a permanent FinTech innovation and communication platform so that we can jointly bear witness to Taiwan's potential in FinTech development.

Industry Benefits

Expand Taiwan's FinTech ecosystem and bring together the finance and technology industries to create cross-sector value and co-create a platform for exchanging ideas.

International Benefits

Make FinTech Taipei an exhibition brand for international FinTech innovation and combine the capacity for innovation in Taiwan and abroad to create synergy for mutually beneficial communication and development.

Talent Cultivation Benefits

Focus on the needs of the participating businesses and integrate FinTech innovations and applications to create a one-stop multi-business and talent matching platform that strengthens cross-sector cooperation and talent exchange in FinTech.

Welcome to FinTech Taipei 2024!

With information technology driving global transformation, financial technology is profoundly reshaping the future of the financial industry. From artificial intelligence and blockchain to digital transformation and sustainable finance, these rapidly evolving technologies not only open new avenues for development but also redefine the boundaries of financial services, presenting both significant change and formidable challenges.

To advance FinTech development and enhance the financial industry's competitiveness, the Taiwan Financial Services Roundtable, under the guidance of the Financial Supervisory Commission, established the FinTech Development Fund in 2016 by pooling resources across the financial sector. The fund aims to build a diverse and collaborative FinTech ecosystem through initiatives such as hosting FinTech Taipei, promoting FinTech innovation parks, cultivating FinTech talent, driving collaborative platform initiatives, and expanding international cooperation.

Since its debut in 2018, FinTech Taipei has received widespread acclaim and grown to become Taiwan's largest FinTech event. This year, the main activities include the FinTech Expo, the International FinTech Summit Forums, the Practical FinTech Applications Seminar, the Policy Achievement Theme Pavilion, and the FinTech Taipei Awards Ceremony. The event brings together over 200 financial institutions and startups from 12 countries to showcase their latest innovations. Additionally, through the FinTech Taipei Awards, we celebrate teams demonstrating excellence in financial innovation, co-creation, international market potential, and green FinTech, which reflects Taiwan's FinTech potential and capabilities.

This year, the Policy Achievement Theme Pavilion centers on "Technology Prevents Fraud, Finance Comes Along," encompassing key areas such as FinTech policy development, joint validation, innovative identity verification applications, and FinTech talent cultivation. It also promotes inclusive education on technology-enabled fraud prevention, demonstrating the government's commitment to creating a more convenient and secure financial environment.

According to statistics, Taiwan's financial sector is expected to invest NT\$37.3 billion in FinTech development in 2024, with an annual growth rate of 28.4%. This indicates a strong commitment to advancing financial technology. Looking forward, the integration of finance and technology will accelerate. Through this event, we aim to foster collaboration and spark further innovation in FinTech and create a more seamless financial environment.

Taiwan Financial Services Roundtable
Acting Chairman **Philip Chen**

With guidance from the Financial Supervisory Commission (FSC), FinTech Taipei 2024 is co-organized by the Taiwan Financial Services Roundtable (TFSR) and the Taiwan Academy of Banking and Finance (TABF), marking its seventh year as an annual highlight in financial technology. This event serves as a key platform that focuses on digital transformation and sustainable development within the financial sector. This year's theme, "More than FinTech, Intelligent Finance Creates Sustainable Future," underscores the integration of AI technology, sustainability, and financial services.

According to the IMD World Digital Competitiveness Ranking 2023, released in May by the International Institute for Management Development (IMD) in Switzerland, Taiwan ranked ninth among 64 major countries and economies in digital competitiveness. As a convergence point for technology and finance, Taiwan recognizes that tech innovation is the driving force behind the financial sector's transformation. This year's event brings together leading global FinTech experts to foster collaboration to explore the opportunities and challenges of the intelligent finance era.

FinTech Taipei 2024 welcomes experts from 12 countries, including the United States, United Kingdom, Canada, Australia, France, Switzerland, Lithuania, Japan, Hong Kong, Malaysia, South Korea, and Israel, and features over 200 participating financial institutions, government agencies, startups, and academic teams.

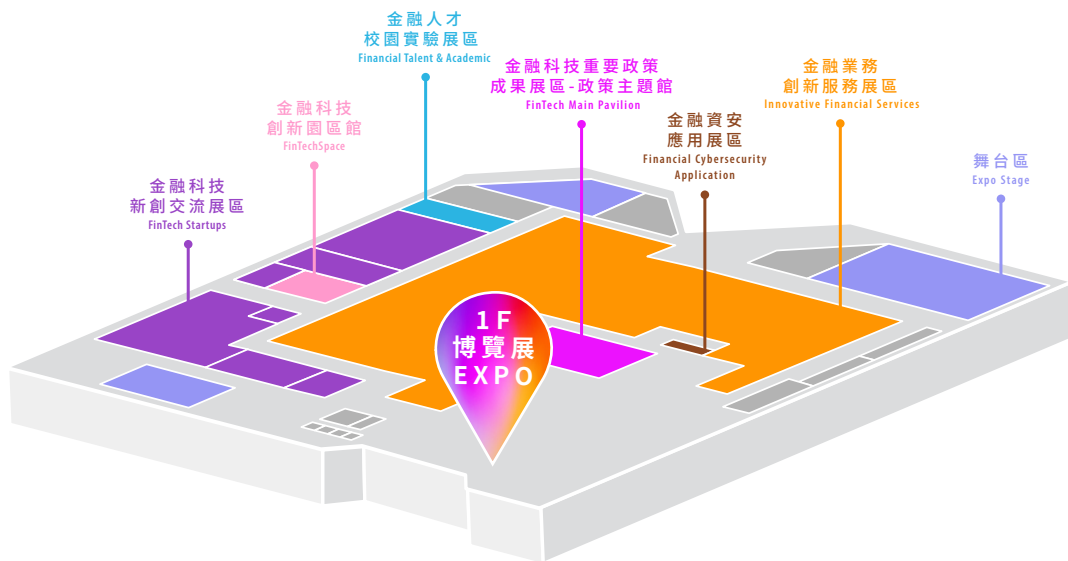

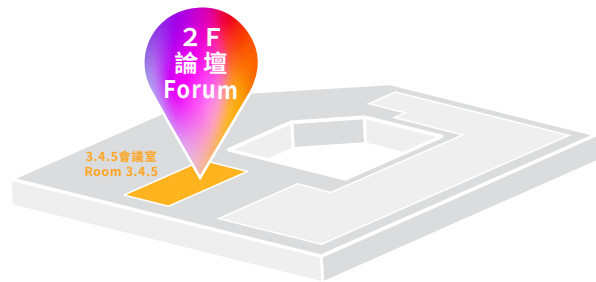

The exhibition is designed to engage participants as "Intelligent Finance Explorers" by allowing them to interactively experience AI-driven services and the integration of virtual and physical exhibits that showcase how FinTech is enhancing financial services. On the first day, the International FinTech Summit Forum will delve into three major themes—AI Transformation, AI Implementation, and AI Governance—discussing AI's impact on financial services. The second day will feature the high-value Practical FinTech Applications Seminar. Throughout the two-day event, the diverse activities are expected to attract tens of thousands of visitors and offer a dynamic showcase of Taiwan's rich and vibrant FinTech landscape. Participating organizations will present real-world examples of their latest achievements in intelligent finance and sustainable development, covering areas such as green finance, intelligent platforms, and AI-driven innovative service models.

More than just a stage for showcasing financial technology innovations, FinTech Taipei serves as a catalyst for transformative thinking in the financial industry. We hope this platform will facilitate discussions among global financial institutions, tech startups, and industry leaders on the future of financial services, ultimately driving the advancement of intelligent finance and sustainable development. At the same time, we aim to offer the public diverse digital financial services that balance convenience and security. With the creativity of financial technology, we believe we can create a better society and improve the competitiveness of our industries.

2024 EXPO Event

FinTech Taipei EXPO Free Admission**Nov. 01 - Nov. 02 | TWTC Hall 1, 1st Floor**

The exhibition includes financial institutions, major international tech companies, and domestic and foreign startup teams and accelerators who showcase their latest FinTech applications in blockchain, AI, and big data. The unique characteristics of the booths are connected for visitors to learn about the latest FinTech applications and international trends with ease.

FinTech Main Pavilion Free Admission**Nov. 01 - Nov. 02 | TWTC Hall 1, 1st Floor**

The Policy Pavilion is built around this year's fintech policy direction and reflects the impact of AI on banking. The pavilion highlights how Taiwan's financial services have developed under fintech policy guidance, with innovative applications in joint empirical research and identity verification, fintech talent cultivation, and inclusive education on technological fraud prevention. Let's write a new chapter in finance and strive to create an "AI+, More than Fintech" future that balances convenience and security.

Free Admission

Domestic and International FinTech Startups Demo Show**Nov. 01 - Nov. 02 | TWTC Hall 1, 1st Floor, Startups Stage**

FinTechBase has invited fintech startups from around the world and global accelerators to speak on selected startup highlights and trends, supplemented with speeches on fintech trends worldwide, global innovation, and features of global accelerators. FinTechSpace has also invited cross-industry collaboration and investment departments of venture capital firms and financial institutions to participate in the event.

FinTech Talent Stage Show

The event will feature thematic sessions on campus-based empirical research, enterprise-lab collaboration demos, digital sandbox campus initiatives, fintech talent demands, key skills sought by enterprises, financial industry recruitment, fintech certification programs, and international financial academies. Each session promises exclusive, insightful presentations.

FinTech Talks**Nov. 01 - Nov. 02 | TWTC Hall 1, 1st Floor, Main Stage**

The organizers have invited financial institutions, IT and telecommunication, and fintech companies from around the world to share fintech results and solutions. The organizers have also invited major international tech companies to speak on leading technologies and trends and

2024 EXPO Forum

International FinTech Forum Free Admission**Nov. 01 | TWTC Hall 1, 2nd Floor**

Focusing on the three main themes of "AI Development and Transformation, AI Innovation and Application, and AI Policy Governance," the discussions will explore the impact on financial services. Experts from the US, UK, Canada, Australia, Israel, Lithuania, and Switzerland are invited for in-depth exchanges to promote the development of FinTech in Taiwan and align with international trends.

Fintech Application and Practice Seminar Free Admission**Nov. 02 | TWTC Hall 1, 2nd Floor**

Experts from different sectors, including banking, technology, and fintech, are invited to join panels and speak in terms of industry, technology, service, and ecosystem in discussions on development in fintech and trends in technology.

Welcome FinTech Taipei 2024 Policy Pavilion!

Financial technology continues to present unlimited possibilities thanks to AI. Here at the Policy Pavilion, we hope to introduce to you the key policies that the government has in place, and present to you how AI and FinTech can be incorporated to create a financial system that is "user friendly, secured, technology-driven, inclusive, and effective against fraud." Join us and experience for yourself the magic that AI brings to financial technology!

Map

Joint Validation

- 01 AI Eagle Eye Alliance on Federated Learning Project
- 02 Joint Authorized Push Payment Fraud Prevention Plan Integrating Telecom and Financial Fraud Data
- 03 Life Insurance Claims Sharing Ecosystem
- 04 Cross-Institutional Financial Anti-Fraud Pilot Project Using Federated Learning Technology

Chapter I Policies

- How Taiwanese government is able to incorporate AI into financial technology in such a way that drives innovation and creates a security protection network for the stability of the financial system.

Chapter II Joint Validation

Cooperating with counterparts from other industries to jointly validate innovations and create robust protection against financial fraud.

Chapter III Identity Verification

- Using more comprehensive, more secured, and more convenient means of identity check and protection mechanisms for security clearance, particularly in an era when passwords are being phased out.

Chapter IV Talent Development

Chapter V General Education

Bringing fresh blood into Taiwan's financial industry and connecting with the rest of the world by developing talents in the fields of international finance and FinTech.

Raising and updating anti-fraud awareness among the public through awareness campaigns.
